Cross Sectional Shape:

Tee inner ring

Inside Diameter:

Between 9.994 inches and 9.997 inches

Outside Diameter:

Between 10.474 inches and 10.478 inches

Intermediate Ring Quantity:

1

End Application:

B-2

Joint Type:

Scarf-peripheral bottom ring

Product Name:

Shock strut assembly

Special Features:

E" designation is for "flash free"

Height:

Between 0.579 inches and 0.589 inches

Material:

Rubber butadiene-acrylonitrile class nbr inner ring

Material Specification:

Ams-p-83461 assn standard single material response inner ring

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A032a0
