Cross Sectional Shape:

Rectangular

Nonmetallic Hardness Rating:

65.0 shore durometer a

Min. Tensile Strength (psi):

1000 pounds per square inch

Temperature Rating:

-20.0 degrees fahrenheit and 180.0 degrees fahrenheit

Length:

12.000 inches

Surface Condition:

Smooth both sides

Cross-sectional Height:

6.000 inches

Cross-sectional Width:

0.500 inches

End Application:

Latch assembly

Color:

Black both sides

Material:

Rubber, ams 7270

Material:

Rubber butadiene-acrylonitrile class nbr

Material Specification:

Ams 7270 assn standard single material response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A26800
