**Cross Sectional Shape:**

Metal w-shape

**Cross-sectional Height:**

Between 0.136 inches and 0.156 inches

**End Application:**

Rmv assembly, unit 21

**Product Name:**

Exhaust e-seal

**Special Features:**

Polytetrafluoroethylene coating thickness is 0.002 to 0.005 in

**Material:**

Nickel alloy 718

**Material Specification:**

Sae-ams5596j assn standard single material response

**Surface Treatment:**

Plastic polytetrafluoroethylene

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fig:**

A032a0
