Cross Sectional Shape:

Metal w-shape

Cross-sectional Height:

Between 0.136 inches and 0.156 inches

End Application:

Rmv assembly, unit 21

Product Name:

Intake e-seal

Special Features:

Polytetrafluoroethylene coating thickness is 0.002 to 0.005 in

Material:

Nickel alloy 718

Material Specification:

Sae-ams5596j assn standard single material response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A032a0
