Cross Sectional Shape:

O-ring

Cross Section Outside Diameter:

Between 0.067 inches and 0.073 inches

Center Hole Diameter:

0.989 inches

End Application:

Tristar aircraft

Product Name:

Packing, preformed, ethylene propylene, phosphate ester resistant

Material:

Rubber ethylene-propylene class epm

Material Specification:

Nas1613 anti-corrosion treated prior to packaging military specification single material response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A032a0

Mil-std (military Standard):

spec.
