Cross Sectional Shape:

Dual lip

Accommodated Shaft Diameter:

379.0 millimeters

End Application:

Rudder support system

Construction:

One-piece

Product Name:

Grease seal, upper bearing, lower

Special Features:

Fiber material is aramid which is a flame resistant fiber

Material:

Fiber and rubber butadiene-acrylonitrile class nbr

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A032a0
