Fabrication Method:

Braided and latticed

Min. Tensile Strength (psi):

500 pounds per square inch

Tempurature Rating:

-170.0 degrees fahrenheit and 550.0 degrees celsius

Lubrication Material:

Silicone rubber

Special Features:

Ph range 0-12, shaft speed to 2500 fpm plus

Material:

Fiber

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A26800
