Cross Sectional Shape:

Square

Fabrication Method:

Braided

Min. Tensile Strength (psi):

1200 pounds per square inch

Tempurature Rating:

1200.0 degrees fahrenheit

Cross-sectional Height:

0.500 inches

Cross-sectional Width:

0.500 inches

Material:

Nickel copper alloy and fiber, nonasbestos and carbon

Material:

Nickel alloy and fiber, nonasbestos and carbon

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A26800
