**Cross Sectional Shape:**

Square

**Fabrication Method:**

Braided

**Min. Tensile Strength (psi):**

1200 pounds per square inch

**Tempurature Rating:**

1200.0 degrees fahrenheit

**Cross-sectional Height:**

0.312 inches

**Cross-sectional Width:**

0.312 inches

**Material:**

Carbon and fiber, nonasbestos and nickel copper alloy

**Material:**

Carbon and fiber, nonasbestos and nickel alloy

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fig:**

A26800
