Cross Sectional Shape:

Square

Fabrication Method:

Braided

Min. Tensile Strength (psi):

1200 pounds per square inch

Tempurature Rating:

1200.0 degrees fahrenheit

Cross-sectional Height:

0.312 inches

Cross-sectional Width:

0.312 inches

Material:

Carbon and fiber, nonasbestos and nickel copper alloy

Material:

Carbon and fiber, nonasbestos and nickel alloy

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A26800
