Accommodated Shaft Diameter:

34.0 millimeters

Seal Width:

8.0 millimeters

End Application:

Hydraulic cylinder

Product Name:

M series double-acting piston seal

Special Features:

18.4 mm cross section; 5 piece seal with central sealing ring of nitrile rubber, polyester elastomer support rings and I shaped guide rings of acetal resin

Material:

Plastic acetal and plastic polyester and rubber butadiene-acrylonitrile class nbr

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A032a0
