Cross Sectional Shape:

Rectangular

Nonmetallic Hardness Rating:

70.0 shore durometer a

Min. Tensile Strength (psi):

4 pounds per square inch

Length:

6.480 inches

Cross-sectional Height:

0.200 inches

Cross-sectional Width:

0.380 inches

Product Name:

Plug

Special Features:

Material is per federal specification zz-r-765 cl 2b gr 70; one one end item is 0.88 wide and 0.41 long then it is 0.38 wide the remainder of the length

Material:

Rubber, ams 3304

Material:

Rubber silicone class q

Material Specification:

Ams 3304 assn standard single material response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A26800
