Construction:

One-piece

Hardness Rating:

45.0 rockwell a and 55.0 rockwell a

Product Name:

Extruded door, seal elastomer

Special Features:

Item is 29 inches long; 1.9375 wide; 0.5625 high at the highest point; has two tear drop shaped bubbles one on each side that are 0.781 wide, that are attached to the based at the outside edge but not in the center; tensile strength 1800 psi min; elongation 400 percent min; t.O. 35d3-11-52-4 figure 2-11 index 73

Color:

Black

Material:

Rubber ethylene-propylene-diene class epdm

Material Specification:

Ams 3260a assn standard single material response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A032a0
