Cross Sectional Shape:

Spherical

Temperature Rating:

-65.0 degrees fahrenheit and 450.0 degrees fahrenheit

Cross Section Inside Diameter:

Between 4.97 inches and 5.03 inches

Cross Section Outside Diameter:

Between 5.13 inches and 5.19 inches

Cross-sectional Length:

Between 3.875 inches and 4.125 inches

End Application:

Fwd fuse 4 5

Special Features:

The operating pressure is 60 psi. The proof pressure is 120 psi. The burst pressure is 180 psi. This is for general purpose.

Material:

Silicone

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A527p0
