Cross Sectional Shape:

Single lip

Accommodated Shaft Diameter:

1.999 inches

End Application:

Cylinder assembly

Features Provided:

Heat resistant

Housing Bore Diameter:

2.000 inches

Construction:

One-piece

Hardness Rating:

90.0 shore durometer a sealing element

Special Features:

Material is molythane

Material:

Plastic polyurethane sealing element

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A032a0
