Cross Sectional Shape:

Rectangular

Nonmetallic Hardness Rating:

60.0 shore durometer a

Min. Tensile Strength (psi):

1000 pounds per square inch

Temperature Rating:

20.0 degrees fahrenheit and 160.0 degrees fahrenheit

Length:

400.000 feet

Surface Condition:

Smooth both sides

Cross-sectional Height:

1.000 inches

Cross-sectional Width:

0.250 inches

End Application:

Larc (slep)

Product Name:

Strip, rubber (60 durometer neoprene)

Color:

Black both sides

Material:

Rubber chloroprene class cr

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A26800
