Basic Ingredient:

Lubricating oil and synthetic oil

Quantity Within Each Unit Package:

1.0 pounds

Usage Design:

Is designed to give optimal performance in harsh marine environments. It has been specifically engineered to withstand wet, humid conditions in both fresh and saltwater;

Product Name:

Anti-seize & anti-corrosion compound

Special Features:

Inhibits galvanic corrosion between dissimilar metals; high resistance to seizing, galling, and cold welding; high resistance to salt water corrosion; compatible with all types of metals and most plastics; non-hardening; and non-dripping; brush-top applicator available; capacity: 1000 pounds; physical form: paste; color: brown; material: inhibits galvanic corrosion, superior resistance wash off; weight: : 1.130 pounds; temperature range: -65? To 2400?F

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A26800
