Cross Sectional Shape:

Rectangular

Overall Length:

66.700 inches

Cross-sectional Height:

0.560 inches

Cross-sectional Width:

2.000 inches

End Application:

Kc-46 tanker

Features Provided:

Fabric reinforced

Construction:

Laminated

Product Name:

Seal

Special Features:

O'level ata-55; glass fiber laminate per bms 8080 type v, full width, multiple ply; fin srf-14.672 plus srf-14.68 plus fin f-19.46

Material:

Rubber silicone class q

Material Specification:

Bms1-57 mfr ref single material response

Style Designator:

Strip

Reference Number Differentiating Characteristics:

Item is faa certified

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A032a0
