Cross-sectional Height:

Between 0.067 inches and 0.073 inches

Center Hole Diameter:

Between 0.605 inches and 0.623 inches

End Application:

Gear

Hardness Rating:

70.0 shore durometer a

Special Features:

outside diameter is 0.754

Material:

Rubber polyacrylate class acm

Material Specification:

D5576 assn standard single material response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A510x0
