Cross-sectional Height:

Between 0.135 inches and 0.144 inches

Center Hole Diameter:

Between 2.474 inches and 2.494 inches

End Application:

Aircraft f110 engine fuel control t.O. 2j-f110-4, fig 11, ind 62

Criticality Code Justification:

Agav

Product Name:

Packing, preformed

Special Features:

Heat fused polytetrafluorethylene coating 0.0003-0.0007 inch thick

Material:

Rubber fluorocarbon class fpm

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A510x0
