Cross-sectional Height:

0.125 inches

Center Hole Diameter:

1.125 inches

End Application:

Hardware

Hardness Rating:

70.0 shore durometer a

Special Features:

Temperature range is -60 to +300 degrees f; outside diameter is 1.375; lubricated with glycerin

Material:

Rubber ethylene-propylene class epm

Material Specification:

Mil-std-2041 military standard single material response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A510x0

Mil-std (military Standard):

Mil-std-2041 spec.
