Cross-sectional Height:
0.125 inches
Center Hole Diameter:
1.125 inches
End Application:
Hardware
Hardness Rating:
70.0 shore durometer a
Special Features:
Temperature range is -60 to +300 degrees f; outside diameter is 1.375; lubricated with glycerin
Material:
Rubber ethylene-propylene class epm
Material Specification:
Mil-std-2041 military standard single material response
Shelf Life:
N/a
Unit Of Measure:
Demilitarization:
No
Fiig:
A510x0
Mil-std (military Standard):
Mil-std-2041 spec.
