Cross-sectional Height:

Between 0.205 inches and 0.215 inches

Center Hole Diameter:

Between 17.870 inches and 18.040 inches

End Application:

Hydraulic applications

Product Name:

O-ring

Special Features:

Packing, preformed-m83461 o-ring; however this particular size is not recommended for hydraulic applications per sae aerospace standards

Material:

Rubber synthetic

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A510x0
