Cross-sectional Height:

0.125 inches

Center Hole Diameter:

1.437 inches

Criticality Code Justification:

Zzzw

Product Name:

(inav)rubber flourocarbon elastomer, high temperature, fluid and compression set resistant (o-ring, class 2, 90 hardness)

Special Features:

Outside diameter is 1.688 inches

Material:

Rubber fluorocarbon class fpm

Departure From Cited Document:

Material will be in accordance with navicp activity hx quality control, manufacturing and testing specifications

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A510x0
