Special Features:

K30 by 30mm discs; 51um pore size; 27.9um thickness; 42 percent open area; sterilize by autoclave, ethylene oxide, gamma irradiation; 500 degrees celisus temperature for dry and wet heat; good chemical resistance

Material:

Steel, corrosion resisting

Material:

Stainless steel

Shape:

Round

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A08800
