Special Features:

Flanged steel ring with black oxide; 2.140 body diameter 2.187 flange diameter 0.416 thk 0.100 flange thk 0.100 flange-to-small-bore end; 1.375 bore diameter counterbored to 1.460 diameter x 0.220 deep; sleeve 2.035 lg x 2.125 bore diameter x 0.032 wall thk soldered for 0.100 along lg to ring; brass seamless tubing unplated; 18 holes evenly spaced in 3 rows; 0.094 hole dia; first row 0.350 from flange end; second row 0.625 from first; third row 0.625 from second; ring is c16-c27

Material:

Brass and steel

Material:

Copper alloy and steel

Surface Treatment:

Oxide

Surface Treatment:

Black oxide

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T08100
