Distance From Centerline To Flat:

0.156 inches

Length:

Between 0.640 inches and 0.650 inches

Cross-sectional Shape:

Round

Width Across Flats:

Between 0.307 inches and 0.314 inches

Special Features:

Item is tapered at 1 end w/0.060 radius porm 0.020 in., distance from end to beginning of tapered portion is 0.480 in.; item requires 2 coarse & f insert screw thds p/n ms21209f1-10 that are installed per ms33537 w/positional tolerance to the minor diamete (0.369 to 0.371 in.) of the tapped hole not the insert; is used on lantirn targeting pod

Material:

Aluminum alloy 6061

Material Specification:

Qq-a-250/11 federal specification single material response

Style Designator:

Left internal thread

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A08900
