End Application:

F100pw229 engine

Special Features:

Double angle on first leg end in clip bend fashion with thickness of 0.062 and three mounting holes

Material:

Nickel alloy 625

Material Specification:

Ams5599 assn standard single material response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A042a0
