End Application:

Used on Iru-20/a inflation cylinder for inflatable life raft.

Core Diameter:

0.360 inches

Usage Location:

Outside

Features Provided:

Core and heat number

Core Fusing Temperature Rating:

216.0 degrees fahrenheit

Special Features:

Item has hexagon head with temp rating engraved. There is o-ring between head and threaded shaft.

Material:

Copper alloy casing

Thread Size And Series/type Designator:

7/16-20 unf

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A539w0
