Cross Sectional Shape:

Flat

Width:

140.0 millimeters

Edge Shape:

Rectangle, no holes

Length:

407.0 millimeters

Corner Radius:

12.0 millimeters

Securing Device Type:

Hinge

End Application:

544 e john deere 10k forklift

Product Name:

Door-battery box

Special Features:

Item includes hinge and handle which is attached by welding method-metal arc weld per dtw 626. Material is listed as 6 jdm 1020 h steel or jdm a13c hr steel; distance from edge along width to center of hole by which handle is attached is 70.0 inches, distance from edge to center along length is 25.0 inches

Material:

Steel

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A531n0
