Cross Sectional Shape:

Arched

Inside Corner Radius:

0.060 inches

Body Thickness:

0.050 inches

Securing Device Type:

Threaded fastener

Special Features:

Item shape, 1 end straight, other end rounded. 8 holes 0.140 dia. Original drawing name "cover, side"

Material:

Aluminum alloy 6061

Material Specification:

Qq-a-250/11 federal specification single material response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A531c0
