**Width:**

4.000 inches

**Thickness:**

1.250 inches

**Length:**

5.000 inches

**Cushioning Material:**

Plastic, polyurethane and aluminum alloy

**Product Name:**

Saddle band

**Special Features:**

Pad is made from 1.250 inch stock aluminum (qq-a-250, aly 5061, t651); four holes 0.406 inch in diameter are drilled through in two rows of two holes, centered 1.000 and 3.000 inches from left edge and 0.866 and 2.268 inches from bottom; holes are countersunk 82 degrees to depth of 0.190 inch; one surface is rounded out (radius of 10.560 inches from point 11.020 inches from other parallel surface; then polyurethane molding and potting compound (mil-m-24041, cat a, ty i) is adhered to the rounded out surface

**Supplementary Features:**

End item: los angeles class ss (688) ; lashing band

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fig:**

T141-e
