Width:

2.690 inches

Thickness:

0.380 inches

Length:

2.281 inches

Mounting Hole Diameter:

0.440 inches all holes

Mounting Hole Quantity:

2

Mounting Hole Type:

Unthreaded

End Application:

Panel, ind

Product Name:

Retainer assembly bottom, fwd bearings

Special Features:

5 sided shape, first flat length 2.690 inches, then corner radius of 0.120 inches, second flat length 2.281 inches, then corner radius of 0.120 inches, third flat length 0.970 inches, then corner angle of 45 degrees, fourth flat length 2.810 inches, then corner radius of 0.093 inches, fifth flat length of about 0.500 inches, then corner radius of 0.250 inches; used for retainer assembly bottom, stbd.

Material:

Steel comp 304 or steel comp 316

Material Specification:

Qq-s-766, cond a federal specification single material response

Shape:

Irregular

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A530d0
