Inside Diameter:

35.0 millimeters

Material Thickness:

52.000 inches

End Application:

Ecp-544

Special Features:

Deflector (oil slinger) with serpentine cut ring (allows it to be installed over the rod, eliminating the need to pull the piston; ring is then held in place by stainless steel tension band, closing the serpentine cut to a zero gap; used to protect your non-lubed packing from crankcase lubricant

Material:

Filled-ptfe

Material:

Filled-ptfe

Style Designator:

Round, grooved

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A23700
