Overall Length:

6.307 inches

End Application:

4930-01-517-6942

Product Name:

Head assembly

Special Features:

Bottom of shaft has 2 drilled holes positioned 0.43 inches from end to hole center; 1 hole is 0.187 inches min/0.192 inches maximum diameter and 1 hole is 0.505 inches min/0.515 max; small hole is located on right hand side of end of shaft; larger hole is located on left hand side end of shaft

Material:

Steel

Material Specification:

Bar steel 4340 iaw sae-ams6415 for shaft and plate steel gr 50 iaw astm a572 for plate national standard single material response

Surface Treatment Specification:

Thermal spray iaw aws c2.23m/c2.23 national std/spec single treatment response

Thread Size And Series/type Designator:

1.250-12 2a unf

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A558k0
