Usage Design:

Metal working

Abrasive Material:

Aluminum oxide or boron carbide or silicon carbide

Screen Grit Size Designator:

280

Abrasive Diamond Powder Concentration Designation:

Medium

Compound Weight:

4 ounces

Abrasive Lubricant Type:

Grease hydrocarbon base

Reference Number Differentiating Characteristics:

Material will be in accordance with ships parts control center activity hx quality control, manufacturing and testing specifications

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A06900
