Inside Diameter:

0.128 inches

Fluted Foil Quantity:

8

Gripping Surface Condition:

Grip aid

Shaft Accommodation Style:

Flatted one side

Outside Diameter:

0.500 inches

Attachment Method:

Shaft

Inside Width:

0.108 inches

Overall Thickness:

0.440 inches

End Application:

Control panel assembly

Material Transparency:

Clear

Criticality Code Justification:

Agav

Pointer Design:

Detachable

Product Name:

Inavy)knob transilluminated

Special Features:

Material is thermoplastic molding compound, gray in color, with indicator being frosted clear with white border line followed by black border line; clear area is 0.040 inches, white extends to 0.800 inches and black extends to 0.140 inches

Color:

Gray, federal standard 595, 36231

Material:

Plastic

Style Designator:

Round fluted

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A530m0
