Product Name:

Valve, spring

Special Features:

Suction and discharge valves model numbers: g/b 1000, 1601, 1201, 0803, 1002; bt 4 & g/l 1000, 1601, 1602, 1005, 1605. Pressure rating = 1 or (0.05 bar). Item is .250 inch. Discharge valve springs may be used instead of an external backpressure valve to improve repeatability when discharging to an open tank. Suction valve springs in excess of 1 psig (0.05 bar) make priming difficult; and in the excess of 7 psig (0.5 bar) makes pumping impossible, except where suction pressure exceeds spring pressure. Not recommended for antisiphon-use a diaphragm-type backpressure valve for antisiphon protection.

Material:

Steel comp 316

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A02900
