Inside Diameter:

Between 1.380 inches and 1.382 inches

Outside Diameter:

Between 1.624 inches and 1.626 inches

Overall Thickness:

Between 0.430 inches and 0.450 inches

Surface Finish:

63.0 microinches

Special Features:

Inside right corner rounded by 0.496 in. Radius, outside left corner chamfered 0.062 in. Deep by 15 degrees angle

Material:

Steel comp 630

Material Specification:

Ams 5643 assn standard single material response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A07000
