Inside Diameter:

2.500 inches

Outside Diameter:

Between 2.918 inches and 2.920 inches

Overall Thickness:

0.031 inches

Special Features:

Not casehardened; surface finish and location: largest outside surface; 63.0; surface finish and location: bore; 63.0; hole shape: round; shape: round; fsc application data: 1. Combustion controls

Material:

Stainless steel

Material Specification:

Aisi 304 assn standard single material response

Surface Treatment:

Passivate

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A07000
