Inside Diameter:

Between 0.622 inches and 0.628 inches

Outside Diameter:

Between 0.658 inches and 0.688 inches

Overall Thickness:

Between 0.048 inches and 0.052 inches

Surface Finish:

125.0 microinches

Material:

Steel comp 321

Material Specification:

Ams 5645 assn standard single material response

Surface Treatment:

Passivate

Fsc Application Data:

1. Turbo-jet engine, aircraft

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A07000
