Overall Length:

1.000 inches

Overall Width:

0.625 inches

Special Features:

The item is countersunk to a depth of 0.175 inches with a diameter of 0.437 inches at a base of 82 degrees; the item is then drilled through at diameter of 0.406 inches plus 0.004 inches and chamfered to 0.030 inches by 45 degrees

Material:

Steel

Surface Treatment:

Cadmium and chromate

Surface Treatment Specification:

Qq-p-416, type ii, class 2 federal specification single treatment response

Style Designator:

Rectangular

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A07000
