Inside Diameter:

Between 1.932 inches and 1.945 inches

Outside Diameter:

Between 2.362 inches and 2.378 inches

Overall Thickness:

Between 0.059 inches and 0.067 inches

Criticality Code Justification:

Matt and aarx and abhe and adum

Special Features:

This part is in the primary aircraft control system, any incorrect part could cause loss of life, all dimensions with tolerances indicated to be tighter than block tolerances must be 100 percent inspected

Material:

Aluminum alloy 6061

Material Specification:

Qq-a-225/11, t6 federal specification single material response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A07000
