Inside Diameter:

Between 1.002 inches and 1.007 inches

Outside Diameter:

Between 1.095 inches and 1.105 inches

Overall Thickness:

0.062 inches

Criticality Code Justification:

Feat

Special Features:

Cross sectional side tapered to an angle of 0 degrees 30 minutes also outside edge has a medium straight knurl

Material:

Steel

Material Specification:

Astm a582, cond a assn standard single material response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A07000
