Inside Diameter:

Between 9.735 inches and 9.755 inches

Outside Diameter:

Between 11.740 inches and 11.760 inches

Overall Thickness:

Between 0.730 inches and 0.770 inches

Special Features:

One hole 0.125 in. Diameter 0.125 in. From inside edge, four 0.031 in. W grooves on one bearing surface

Material:

Steel

Material Specification:

Astm a515, grade 70 assn standard single material response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A07000
