Inside Diameter:

Between 1.815 inches and 1.825 inches

Outside Diameter:

Between 2.260 inches and 2.270 inches

Overall Thickness:

Between 0.064 inches and 0.066 inches

Special Features:

2 slots equally spaced on bearing surface; 0.050 in. Min, 0.070 in. Wide; 0.150 in min, 0.025 in. Maximum deep

Material:

Plastic polytetrafluoroethylene

Material Specification:

A50tf22 class a, general electric co mfr ref single material response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A07000
