Cross-sectional Height:

Between 0.166 inches and 0.186 inches

Minor Height:

Between 0.150 inches and 0.170 inches

Special Features:

One bolt hole set 0.340 in. From left edge of spacer to center of bolt hole and the other bolt hole set 0.590 in. From right edge to center of bolt hole; right side of spacer is rounded to 0.040 in. Thick w/radius of 0.500; a groove 0.500 in. Wide and cut to 0.080 in. Thick is located in center of spacer

Material:

Aluminum alloy 2024

Material Specification:

Qq-a-250/4, t851 federal specification single material response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A07000
