Cross-sectional Height:

0.220 inches

Minor Height:

0.100 inches

Special Features:

Qboth cross-sectional ends have chamfer of 0.240 in. Long; on left side chamfer is 0.100 in. Wide reducing major thickness to 0.120 in. And on right side chamfer is 0.060 in. Wide reducing minor thickness to 0.040 in.

Material:

Aluminum alloy 2024

Material Specification:

Qq-a-250/4, t851 federal specification single material response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A07000
