Cross-sectional Height:

Between 0.180 inches and 0.200 inches

Minor Height:

Between 0.090 inches and 0.110 inches

Special Features:

Left side cross sectional minor height beveled to 0.040 in., length of bevel is 0.100 in.

Material:

Aluminum alloy 2024

Material Specification:

Qq-a-250/4, t81 federal specification single material response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A07000
