Overall Length:

3.000 inches

End Application:

Lgm30g, minuteman iii missile

Hole Inside Diameter:

1.187 inches

Thready Qty Per Inch (tpi):

8

Thread Size:

3.000 inches

Special Features:

Right hand threads; wrenching facility shape hexagonal; screw thread length 2.25; width across flats 1.97 min and 2.00 max; no counterbore or countersunk feature; assembly of 2 nylok inserts (p/n 9512605-07) 0.350 in. Long and 0.310 in dia., which are press fit into bushing (p/n 9512605-03) holes for inserts are located at 90 degrees angle from each other, 0.312 in diameter and 0.350 in deep, and on threaded part of bushing 0.320 in from end closest to wrenching hex head; original name-bushing

Material:

Plastic

Material Specification:

L-p-410 federal specification single material response

Thread Series Designator:

Un

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
